

Lex Joseph Tabi

Senior Software Engineer | DevOps Engineer

Manila, Philippines | lexjosephrobi@yahoo.com | [linkedin.com/in/lexjosephrobi](https://www.linkedin.com/in/lexjosephrobi) | github.com/lexrobi

PROFESSIONAL SUMMARY

Senior Software Engineer and DevOps Engineer with experience supporting enterprise Warehouse Management Systems, release deployments, incident and change management, monitoring, automation, and operational documentation. Strong background in application/cloud support, production troubleshooting, stakeholder communication, and process improvement.

CORE SKILLS

- DevOps and release: Azure DevOps, JIRA, ServiceNow, Confluence, RunDeck, Ansible
- Monitoring and operations: ELK, Dynatrace, Nagios, IBM Workload Scheduler, alerting, dashboard creation
- Warehouse systems: Manhattan Associates WMS, Exacta/Autostore, Digital Shipper/CMP
- Scripting and data: PowerShell, Bash, shell scripting, basic Python, Oracle PL/SQL, SQL Server Management Studio
- Platforms and tools: Linux, Windows, SSH, PuTTY, MobaXterm, Venaafi, CyberArk, Keeper

PROFESSIONAL EXPERIENCE

Senior Software Engineer - DevOps Engineer | Accenture PH, Warehouse Management System | March 2024 - Present

- Execute release deployments through Azure DevOps to support smooth transitions across environments.
- Manage testing and automation task assignments using JIRA and maintain process documentation in Confluence.
- Oversee incident, problem, and change management activities through ServiceNow.
- Collaborate with testing teams across development, test, and production-like environments to maintain quality assurance.
- Assist L2 Support with issues related to recent deployments, helping drive quicker resolution.

Senior Software Engineer - App/Cloud Support Senior Analyst | Accenture PH, Warehouse Management System | April 2018 - March 2024

- Identified and resolved application issues to reduce downtime and minimize operational disruption.
- Provided technical support to warehouse operators, managers, and IT staff.
- Configured Warehouse Management System functionality based on business requirements.
- Participated in testing new features, patches, and upgrades before production deployment.
- Maintained user manuals, troubleshooting guides, standard operating procedures, and support documentation.
- Worked with developers, business analysts, and project managers to improve support processes and system operations.

Email Support, Technical Support, Data Operations, and Customer Care Roles | Telus International PH, Convergys PH, Jobstreet.com PH, IBM | 2011 - 2018

- Handled customer, account, and technical support requests across transportation, gaming, financial, and data operations accounts.
- Built a strong foundation in troubleshooting, escalation handling, service quality, confidentiality, and customer communication.
